**A Day in the Life...**

**Primary Years (Ages 6-10)**

8.30am - 1.30pm

- **Kelly explores her unit of inquiry ‘ Sharing the Planet’ and discusses the central idea, ‘People can make choices to support the sustainability of the Earth’s resources’. Using a range of the latest ICT tools, her classmates work in collaborative small groups, researching different areas of sustainability and share their learning with each other. Kelly is concerned about wasting natural resources and starts to draft a letter and designs a poster persuading the school community to take action, to highlight our environmental impact.**

1.30pm - 2.30pm

- **Kelly is offered a range of healthy eating choices in our cafeteria. Snacks are available in the cafeteria at recesses and hot and cold food is served at lunch time. Students are welcome to bring packed lunches or snack boxes to school as well. Our out-sourced school catering company works with GWA-Singapore and our families to ensure that the menu offerings are well-balanced and appetizing. Kelly pays for her food using GEMS-World Academy-Singapore latest cashless swipe card technology.**

3.00pm - 4.00pm

- **Kelly explores her unit of inquiry ‘Sharing the Planet’ and discusses the central idea, ‘People can make choices to support the sustainability of the Earth’s resources’. Using a range of the latest ICT tools, her classmates work in collaborative small groups, researching different areas of sustainability and share their learning with each other. Kelly is concerned about wasting natural resources and starts to draft a letter and designs a poster persuading the school community to take action, to highlight our environmental impact.**

5.00pm - 6.00pm

- **Kelly pays for her daily language lesson in either Mandarin or Spanish from her experienced language specialist. Learning another language will open new doors for Kelly and her classmates personally, professionally and socially.**

*Disclaimer: Please note that the above schedule is indicative only.*

---

**Music Technology and Media**

- **Kelly expands her knowledge and skills about the music industry in the iMac music technology lab, recording studio and live room (for recording live performances), green screen room, and editing suite. Kelly increases her knowledge of Logic Pro, Sibelius, and Final Cut Pro which allows her to develop films and music content to post throughout the school. The practice rooms are acoustically treated and include iPod dock with quality music instruments. Kelly’s teacher keeps audio records of all classes and introduces her classmates to the process of recording.**

**Physical Education**

- **Kelly has her weekly swimming lesson in the Olympic size pool. Under the guidance of the swimming coach, she works on improving her swim stroke and kicking techniques.**

**Unit of Inquiry – ICT / Literacy**

- **Kelly’s teacher keeps audio records of all classes and introduces her classmates to the process of recording.**

**Lunch Break**

- **Kelly has her daily language lesson in either Mandarin or Spanish from her experienced language specialist. Learning another language will open new doors for Kelly and her classmates personally, professionally and socially.**

**Languages**

- **Kelly explores her unit of inquiry ‘Sharing the Planet’ and discusses the central idea, ‘People can make choices to support the sustainability of the Earth’s resources’. Kelly is concerned about wasting natural resources and starts to draft a letter and designs a poster persuading the school community to take action, to highlight our environmental impact.**

**Depart for Home**

- **Kelly is offered a range of healthy eating choices in our cafeteria. Snacks are available in the cafeteria at recesses and hot and cold food is served at lunch time. Students are welcome to bring packed lunches or snack boxes to school as well. Our out-sourced school catering company works with GWA-Singapore and our families to ensure that the menu offerings are well-balanced and appetizing. Kelly pays for her food using GEMS-World Academy-Singapore latest cashless swipe card technology.**

- **Kelly explores the Social Studies Strand ‘Resources and the Environment’ in the planetarium. Subjects such as Art, History, Geography, Physics and Biology can be displayed and taught within this immersive classroom. The ability to move from the macro environment of space, to the microscopic environment of cells and atoms creates a facility where all aspects of the curriculum can be envisaged in a unique and exciting way.**
